---

Place two fists together, with your inner wrists touching. Your brain is about this size and shape. In contrast to the rubbery pink models we have seen, the brain is amazingly soft, composed primarily of fat and water. It is grayish and pudding-like - composed of 100 billion brain cells - called neurons, that drive our thinking, learning, feeling and states of being. Neurons need good fats, protein, complex carbohydrates, micronutrients - vitamins, minerals and phytonutrients - and water. These nutrients are used to drive the learning functions of neurons.

STAYWELL PROUDLY INTRODUCES

THE MOST COMPREHENSIVE BRAIN SUPPLEMENT ON THE MARKET

PARKINSON'S

## HERE'S WHAT OTHERS SAY ABOUT BRAIN-HEALTH

"Brain Health has given my son his LIFE back. Brain Health has made a fantastic difference to my life and that of my entire family."

"We were at wits' end. My little boy was so unhappy at school—poor results, poor self-image and no self-confidence. Since starting on Brain Health, he has become a happy, confident youngster who is doing well in school and is even taking part in activities like public speaking!"

"Within 1 month of starting on Brain Health my client was able to reduce the dosage of her child's ADHD medication by 50% under medical supervision."  
**Professional Pharmacist**
